

The AIM Gold plan

The AIM Gold plan is not only affordable.... it will save you money.

Since AIM provides coverage for thousands of students visiting Israel we can offer the AIM Gold plan at a lower cost than the deductibles on most US health plans and HMO's. Since hospital care is authorized by a primary care physician, you can be assured that in our network of more than 200 participating senior physicians, some of the best doctors in Israel will be providing medical services for your son or daughter.

Early registration on the AIM Gold plan is for a full year \$595 or about \$1.63 per day!

AIM and COVID 19

Throughout the years, AIM has continued to adapt and grow during challenging times.

As COVID19 started in Israel, AIM initiated Telemedicine visits for students. During the telemedicine appointment, the doctor evaluates the patient's condition and discusses any concerns the student may have, including concerns regarding the Coronavirus.

These visits allow students to remain in school instead of traveling for doctor's appointments.

With the increased incidence of viral illnesses this year, we increased our medical staff to see more students in school clinics as well as our office in Yerushalayim.

These services have been used extensively this past year and we plan on continuing them in the future.

Israel?**

AIM

As parents,

we understand the concerns common to parents sending their children abroad. As physicians, we know how important personalized private medical attention is to a student who is thousands of miles away from home.

For the past 33 years, we at AIM have been providing the type of quality medical care that puts the minds of parents and students at ease.

Thousands of students learning in Yeshivas, seminaries and educational institutions throughout Israel have benefited from our private care and when needed - the personal attention of the best specialists in Israel.

The AIM Gold and Platinum plans are designed to provide complete medical coverage for students studying in Israel at a lower cost than deductions on most US health plans and HMOs.

Most important, is the students' feeling that an AIM physician is their family physician away from home and the concerns of parents are being eased.

We hope the student accomplishes his/her objectives in their study program. The AIM Medical Center and our physicians will be available if they need us.

Sincerely,

Dr Steven Eagle
Medical director

It is important

to have personalized **PRIVATE** medical attention when you are thousands of miles away from home.

However, the real value of a medical plan exists in the company behind the plan and it's proven ability to respond in a time of need, day or night.

AIM takes pride in its 33 years of successful services to students, tourists, and expatriots living and or learning in Israel.

The AIM Platinum plan: for only \$100 additional you receive all the popular AIM Gold plan and the most comprehensive series of benefits in today's medical services market .
